BE IT AND IT IS HEREBY ORDAINED BY THE CITY COUNCIL OF THE CITY OF RIVIERA BEACH, PALM BEACH COUNTY, FLORIDA:

That Chapter 17 (Streets and Sidewalks) of the Code of Ordinances be amended as follows:

SECTION 1. REPEALER

The following sections are hereby repealed:

Sec. 17-6. SPECIFICATIONS.

The following specifications are adopted as governing the construction of all sidewalk construction within the corporate limits of the municipality:

- (1) Grade. Subgrade shall be in accordance with the lines, grades, and dimensions as ordered by the municipal engineer.
- (2) Composition of concrete. The concrete shall conform to the specifications governing two thousand pounds concrete as furnished by local ready mixed concrete companies. The slump shall be from three to five inches. Street reinforcement will not be used unless specified by the engineer.

- (3) Forms. Forms can be of either wood or metal. They shall be straight, free from warp or bends and of sufficient strength when staked to resist the pressure of the concrete without springing. If of wood they shall be of two inch surfaced lumber; if of metal they shall be of approved section and shall have a flat surface on top. Forms shall have a depth equal to the plan dimensions for the depth of the concrete being deposited against them.
- (4) Excavation. Excavation shall be made to the required depth and the subgrade or base upon which the sidewalk is to be set shall be compacted to a firm and even surface, true to the grade and cross-section by means of watering and if necessary and tamping.
- (5) Joints. Joints shall be of the open type. The joint shall be formed by staking a metal bulkhead in place and placing the concrete on both sides of it. After the concrete has set sufficiently to preserve the width and shape of the joint, the bulkhead shall be removed. After the sidewalk has been finished over the joint, the slot shall be opened and edged with a tool having a one-half inch radius. After the concrete has hardened and become dry the slot shall be thoroughly cleaned of all debris and all loose material for the full section of the sidewalk.
- Where the plans call for a one-half inch joint between the sidewalk and curb, this joint shall be cleaned as provided above, then filled to within one inch of the finished surface with sand or earth and then sealed with a bituminous filler.
- (6) Finishing. All surplus water latency or inert material shall be worked off the surface of the concrete with a

ten foot straightedge, or by some other method equally satisfactory, which may be approved by the engineer.

The concrete shall then be given a wooden float finish. The surface variations shall not be more than one-fourth inch under a ten foot straightedge, nor more than one-eighth inch on the five foot transverse section. The edge of the sidewalk shall be finished with an edging tool having a radius of one-half inch.

- (7) Curing. Curing shall be done in accordance with Article 160.18, page 208, Florida State Road Department Standard Specifications, 1947. (Ord. No. 290, ss 1, 4-11-51).

Sec. 17-9. SIDEWALKS REQUIRED-RESIDENTIAL AREAS.

- (a) In all residential areas except the Singer Island area, no building permit shall be issued for the construction of any building by the city unless plans for such building include the construction of a sidewalk on the property in front of the building at the street line provided there are sanitary sewer lines within the area to which such building must "tie in" as required by law; and provided further that the city engineer is able to determine and set the grade for the sidewalk.
- (b) In all such cases, such sidewalks shall be so constructed.

Sec. 17-11. SIDEWALKS REQUIRED-EXEMPTION FOR RESIDENTIAL AREAS WITHOUT SCHOOL ROUTE.

- (a) Unless the portions of a developed residential area is part of a school route, no sidewalks shall be required.

Sec. 17-12. SIDEWALKS REQUIRED-IN AREAS WITH HEAVY
PEDESTRIAN TRAFFIC.

- (a) In all "other residential areas" no building permit shall be issued for the construction of any building, by the city clerk and building inspector, unless plans for such building include the construction of a sidewalk on the property in front of the building, at the street line, to be so constructed, provided there are sanitary sewer lines within the area to which such building must "tie in" as required by law; and provided further, should there not be a sidewalk on said premises.
- (b) In all such cases, such sidewalks shall be so constructed.

Sec. 17-13. SIDEWALKS REQUIRED-CONSTRUCTION REQUIRED WITHIN
TWO YEARS.

- (a) Within two years after this ordinance takes effect, all owners of properties in "Commercial Areas"; on "school routes", "and other residential areas", shall construct, or cause to be constructed sidewalks adjoining all streets on which such properties front.
- (b) The cost of such construction shall be on an assessment basis as provided by the Charter of the City of Riviera Beach, the city participating on the basis of 40% of the cost thereof.
- (c) Provisions (a) and (b) above shall not apply to areas where there are no sanitary sewer lines available, to which such properties are required to hook up.
